WHY SIX3TILE?

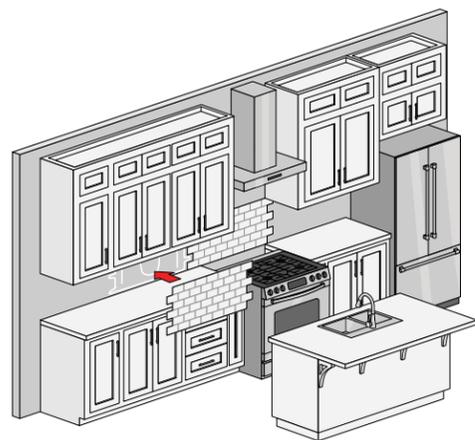

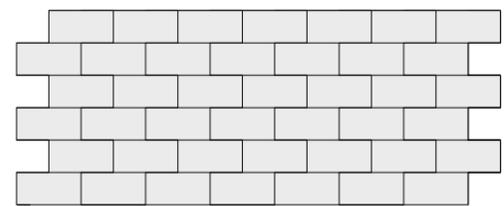

From stylish backsplashes to spa-worthy showers, Six3Tile is crafted from a high-performance polymer, similar to the durable PVC used in today's most trusted building materials. **Six3Tile panels are built to outperform traditional tile. They won't chip, crack, or yellow over time, and they install in a fraction of the time.** Our pre-cut tile panels are easy to handle, adhere with construction adhesive, and finish with grout for a fast, clean, professional look that looks like real tile.

THOUGHTFULLY DESIGNED APPLICATIONS

BACKSPLASH

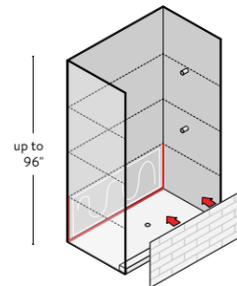

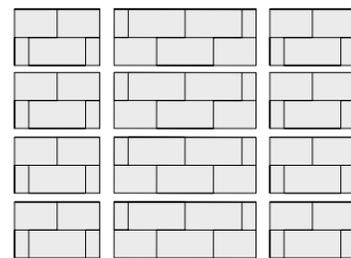

Six3Tile backsplash panels are engineered to align with real-world kitchen standards for a seamless, frustration-free install. Each panel measures ~19" high x 47" wide, giving you 1" of trim allowance above the typical 18" space between countertops and upper cabinets. This built-in flexibility ensures a clean, custom fit without complicated adjustments.

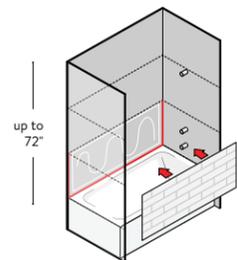

SHOWER, TUB + CORNER SURROUNDS

For bathroom projects, Six3Tile shower and tub surrounds are designed around the most common alcove sizes. Panels are available in ~36", 48", 60", and 72" widths with a 24" height, making them easy to plan and stack. Every panel features tongue-and-groove edges that lock together to create a tight, secure, and watertight installation—perfect for fast upgrades or full renovations.
